

Transportable Doppler Weather Radar Systems

- RDR magnetron based systems for C-band operation
- High performance Doppler technology, including full volume scan capability
- Wide range of solutions and capabilities
- Flexible investment levels with advanced options and upgrades available
- Transportable systems based on proven RDR-250 series permanently installed design- nearly 100 systems installed worldwide
- Low cost
- High reliability
- Proven technology
- Fast delivery

Examples Of Radtec Transportable Radar Systems In The Field

Truck mounted system

Motor home mounted system

Ship mounted system

Complete, transportable TDR 2070C, including antenna, self extending tower, and workstations packed on one airfreight pallet.

Optional High Performance Trailer System

- Optional high performance trailer system including shelter
- Tower with automatic extension / retraction
- Quick setup and teardown; no crane or external equipment required
- Completely self contained; radar with control and display, HVAC and generator
